

Geology and Groundwater Resources  
of the Melfort Area (73A),  
Saskatchewan

## Map 4 Empress Group

### Empress Group Aquifers

Surface elev (masl) Depth to top  
(all units are in metres)  
Depth to water Thickness  
(depths are below ground surface)

### LEGEND

- $\circ$  E-log only
- $\ominus$  E-log, geologist description
- $\oslash$  E-log, driller's log
- $\otimes$  Driller's log

TOWNSHIP

F — F' Cross Section

These maps are accompanied by a series of cross sections which depict the subsurface units along the transects shown on the map. The maps and cross sections are representations of the data taken from the test holes and wells indicated on the maps. The boundaries outline areas in which the aquifer or geologic unit is likely to be found. Aquifers and other geologic units may not always occur continuously within the areas shown, may not be found at a specific site or may occur at elevations other than those indicated. Discontinuous water bearing zones may be found outside the boundaries shown.
